**Transport.data.gouv.fr**

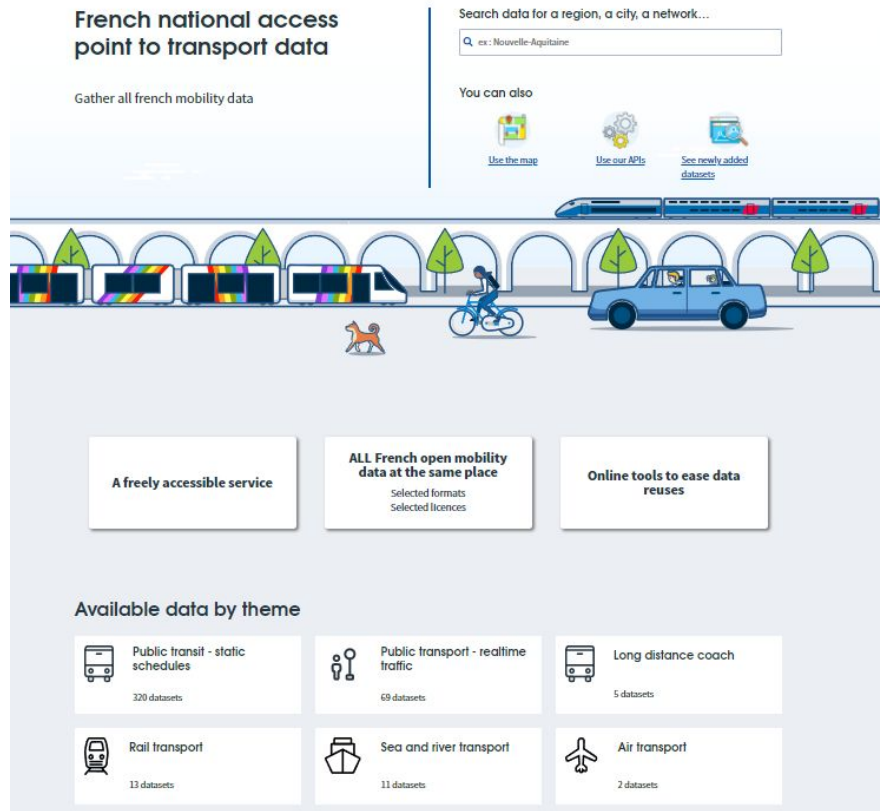

# The French National Access Point (NAP)

*October 16th, 2024 - Maxime SIRET, head of transport.data.gouv.fr*

# Missions

- Encourage the use of **sustainable mobility solutions**
- Raise **awareness and encourage data** producers to open their data
- **Make life easier for data reusers** (discoverable & high quality data)
- **Be an intermediary** between producers and reusers of the data.
- Comply with the **European directive** (late 2019 in France)
- We are 10 people in the team!

# Available data: ~700 datasets

## Public transportation

322 networks

## Promoting sustainable mobility

- Focus our efforts on public transport, bikes, electric charging stations, carpooling, carsharing
- Leverage an appropriate and ambitious legislation
- Work with producers and reusers to improve how citizens move
- Create standards when they don't exist yet and promote european standards (NeTEx, SIRI, Datex...)
- Create and provide free online tooling to produce high-quality data
- Report on available transport options and transport data

Offre théorique du réseau DiviaMobilités au format GTFS (General Transit Feed Specification).
